

On 28 Sep 2010 the Fairfax County Federation of Citizens Associations (The Federation) Board of Directors authorized this statement:

The Federation has long been on record in support of the extension of rail to the Dulles Corridor and to Washington Dulles Airport (Dulles) in particular. We are aware of the increase in costs associated with the Phase 2 engineering studies, and though we would prefer an underground configuration for the station at Dulles, we could countenance the above ground station configuration if the savings attributed to the change contribute to the ability of the extension to be built on time and close to cost.
